Brief narrative description of the child

Arsita is 7 years old. She is affected by Cerebral Palsy with Mental Retardation. Her lower limb & upper limb are badly affected due to Cerebral Palsy. She has also speech disorder & drool saliva. When she came to Asha Bhavan Centre, she was 6 years old. She was unable to feed solid food, sit, and move. Near about 1 year she is receiving therapeutic service from ABC. Now she can recognize family members, able to feed solid food, sit with both hands supported on the floor, crawl little. When someone calls her name she smiles at them. She makes eye contact when spoken to her. At present the child is suffering from seizure disorder. Their financial status is medium. So, she needs medical support. Her parents are very happy with our generous support & seeing this improvement. We expect that she will be more able taking our service in future.
