Brief narrative description of the child

Baisakhi is 4 years old a child with disability. She is affected by Cerebral Palsy with Mental Retardation. Mainly her lower limb more affected than upper limb. When she took admission then she was able to sit with support, but not move. Able to feed semi solid food. Presently she is able to sit without support & crawl little. Can't speak, but bubbling. For her overall development she needs physiotherapy, speech therapy, special education & ADL training management etc. Her father works as a daily worker & gets work only 15 days in a month. She needs a special wheelchair. So it is not possible to manage everything in his low income. In this situation we are trying to give her proper support. We wish our service will help her to walk in future.
