Brief narrative description of the child

When she came to ABC, she was seven years old. Her basic needs were fulfilled by her parents. She couldn't talk with others. Her sensory organs were not adequate. She couldn't follow simple instruction. Unable to perform her daily living activities. Now Aleya is 15 years old. She is dependent on others for her daily basis activities. Now she is able to take bath, but need other's help. She expresses her basic needs by gesture. She plays with other children in a concerted manner. She likes to response to dance and music. She reads in secondary class in special school at Dominique Lapierre School of Excellence for Children with Special Need of Asha Bhavan Centre. She is severe M.R. patient. Her development is very slow. We expect that Aleya will be self-dependent in future. She will be able to talk and will do simple Vocational activity as helper with other. She needs support for education, co-curricular activities for her utmost development. But it is not possible to provide such support in home environment, so the girl needs more support for her betterment.
