Brief narrative description of the child

Now Ankita is 12 years old, a cerebral palsy affected child with 80% disabilities. At the age of 2 years old she came to Asha Bhavan Centre with her grandmother & took admission in residential care unit. From then she is staying in ABC. She was dependent on others for her daily living activities. Receiving therapeutic support now she is able to perform her daily living activities but need some help. Able to walk with Ankle Foot Orthosis & Elbow crutch. Now she is also reading in class-V. Ankita's father left her mother and marry to other woman and stays with her & doesn't give money to meet the family expenses. Few years later Ankita's mother married to a man. None of them don't take care of Ankita. Generally Ankita became abandoned. Then her grandmother brought her to asha Bhavan Centre. At present Ankita needs therapeutic support, ADL management training program, educational support for her optimum development. But it is not possible for her old grandmother to provide any such support in home environment. So the girl needs other's help to develop in life.
