#### Brief narrative description of the child

When she came to ABC, she was nine years old. She is moderate M.R. She could talk with others but not understandable. Her sensory organs were not adequate. She was not able to follow simple instruction. Now she is 10 years old. Her speech is comparatively clear than before. She does her daily basis personal work independently, but when she takes her bath then need other's help. She reads in primary- iii class in special school of Asha Bhavan Centre. She plays bossy attitude in the class room. Her parents are very happy to see this development. We hope that she will go ahead in life. So, she needs study materials.
