### Brief narrative description of the child

Barsha is 8 years old, a cerebral palsy affected child with 80% disabilities. She is able to eat solid food, and moves by crawling. After receiving rehabilitation support from Asha Bhavan Centre now she is partially independent for her daily living activities. Barsha's father works as a daily labor and earns very little amount to maintain the family. It is very difficult for the family to meet the special requirement of their child's improvement. At present she needs a wheel chair for her mobility, physical management program, ADL training program and educational support to become self-dependent in life. At this moment her improvement will be choked without other's help.

**For any assistance, contact Sponsorship officer, Asha Bhavan Centre at: 033-26613197**
